

# Rockin' Newborn Gown Pattern Instructions

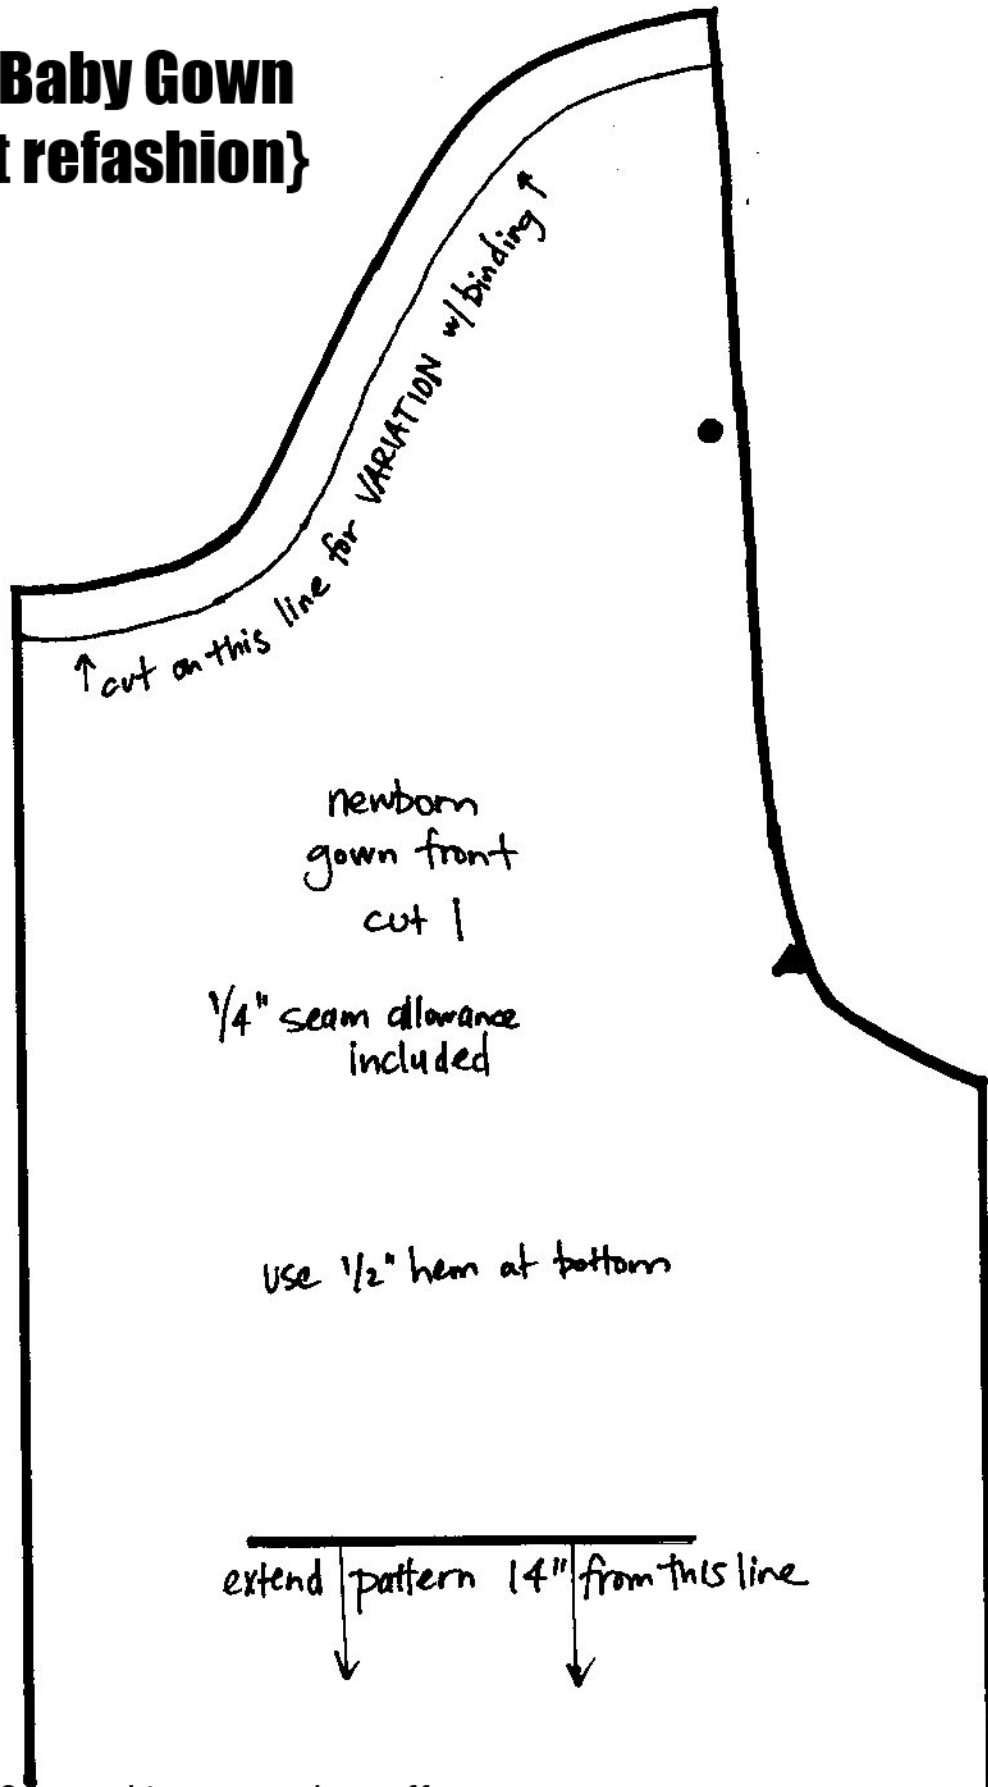

## { t-shirt refashion }

1. Print pattern pdf file.
2. Join upper sleeve and lower sleeve patterns along dotted line.
3. Extend gown front and back patterns **14"** from line noted on pattern. Add **1"** flare at hem onto side of front and back pattern (refer to below photos)
4. For easier placement and cutting, retrace gown front and back patterns so they are full pieces and no longer "on the fold"

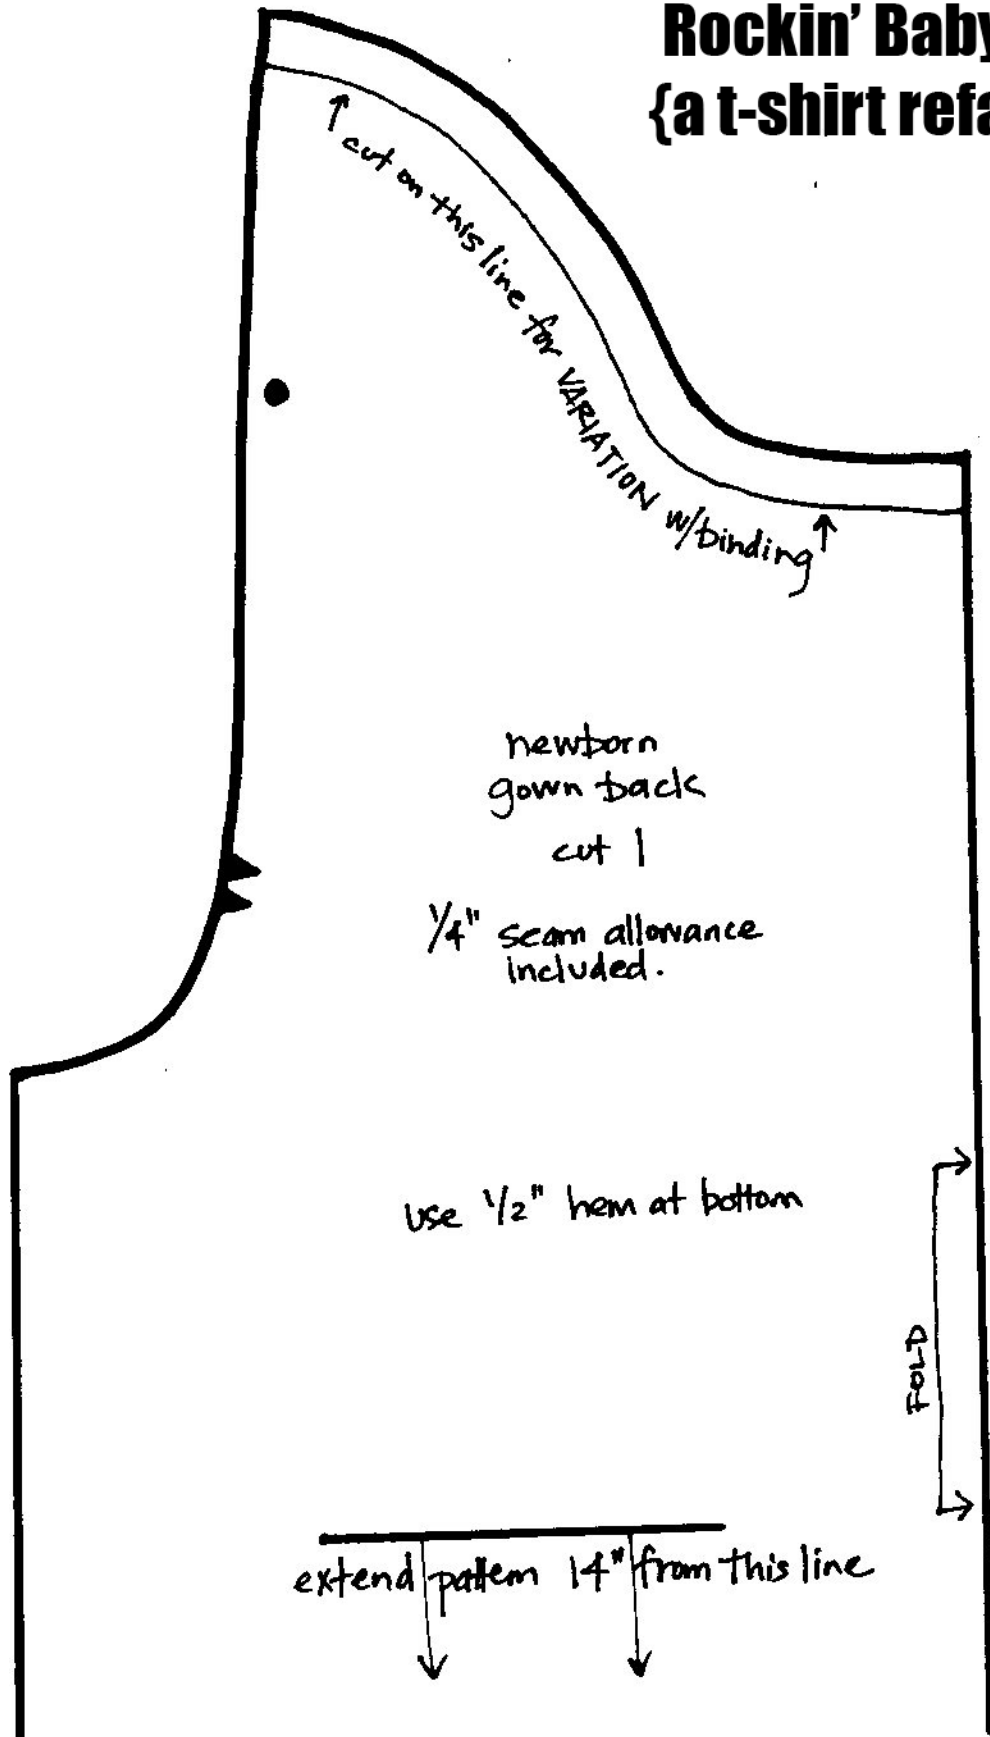

5. Choose placement on t-shirt and cut. There are many different layouts you can use. Your choice may depend on shirt graphic, shirt size, etc. If you are cutting the sleeves one at a time, make sure to flip pattern over to create a right and left sleeve. A long-sleeved gown can usually be easily made from a men's large t-shirt. Be open to including existing seams and hems in your cut pieces. For a gown from a smaller sized-shirt, you might think about making a short-sleeved version or using a second shirt for the sleeves.
6. Be sure to cut the hand flaps (2) (not pictured) with the top edge flush with the hem edge of the t-shirt.
